(디지털 컨버전스) 스마트 콘텐츠와 웹 융합 응용 SW개발자 양성과정

훈련기간: 2021.05.07 ~ 2021.12.08

Vue_Router 설정

```
import { createRouter, createWebHistory } from 'vue-router'
import Home from '../views/Home.vue'
import About from '../views/About.vue'
import Test from '../views/Test.vue'
const routes = [
    path: '/',
   name: 'Home',
    component: Home
    path: '/about',
   name: 'About',
   component: About
   // this generates a separate chunk (about.[hash].js) for this route
   // which is lazy-loaded when the route is visited.
   // component: () => import(/* webpackChunkName: "about" */ '../views/About.vue')
   name: 'Test',
    component: Test
const router = createRouter({
 history: createWebHistory(process.env.BASE URL),
 routes
export default router
```

import는 ? 라이브러리(vue에선 컴포넌트) 추가

path: 는 실제 url 맵핑되는 경로가 설정됨 보편적으로 name과 component는 같은 이름을 사용하며 눈에 보여질 페이지가 배치됨(views에 보통 배치되어 있음)

SPA라서 새로고침없음
